INTERNATIONAL WORKSHOP
BERLIN – DECEMBER 14, 2018

**Evidence-based
Public Health for
Public Health Action**

About the Workshop

„Evidence-based public health is the development, implementation and evaluation of effective programmes and policies in public health through application of principles of scientific reasoning, including systematic uses of data and information systems.“
(Ross Brownson 1999, 2003)

The Robert Koch Institute (RKI) is organizing a full-day workshop on evidence-based public health (EBPH). The workshop is addressed to RKI staff and focuses on application of EBPH for prevention and surveillance of non-communicable diseases.

The workshop programme covers all phases of the public health action cycle. International experts will talk about their experiences and share their expertise to initiate a discussion on the implementation of future EBPH-research projects and training courses at the RKI.

Programme December 14, 2018

- 9:30 a.m. Arrival at meeting site**
