J Health Monit. 2024;9(2):e 12026. doi: 10.25646/12026

In Section 2, 'Indicator', on page 2, the inclusion criterion for hospital cases with diabetes was not fully reproduced; two ICD-10-GM codes (E11.- and E13.-) were missing.

The correct sentence is: 'The analysis included all hospital cases with a main or secondary diagnosis of diabetes (ICD-10-GM codes E10./E11./E13./E14.) of persons aged 15 years and older in the years 2015–2022 for whom a lower limb amputation was documented during hospitalisation.'

The article has been corrected accordingly.
