Following publication of this article it was brought to our attention that María Victoria Francia who contributed in the design of the array and provided target sequences was not included as an author.

Authors' contributions

TM selected and prepared the targets sequences, collected the strains from the coauthors and hosting laboratory, performed the microarray and PCRs, contributed in analyzing and interpretation of the data and writing the manuscript. TP contributed in the design of the experiment, interpretation of data and substantially contributed to writing the manuscript. RW, TC and GW contributed in the design of the assay, provided target sequences, strains and contributed in writing the manuscript. ES contributed in the design, with strains and in the writing of the manuscript. WvS and LBJ provided targets sequences and contributed in writing the manuscript. AS and KH contributed in the design of the assay, interpretation and analyzing of the data and writing the manuscript.

Authors' information

Arnfinn Sundsfjord and Kristin Hegstad are joined senior authors.
